Hello,

Remote-uploads can be used to upload files from different server into your premium zone or collectors zone.

To add URLs click on -Remote-Upload- in your account.

We will then download the file for you and re-upload it in your premium zone.

Normally this will work very fast as we have really big bandwidth here. If the server with the file is very slow, our download will be slow as well of course. Please notice that we will automatically abort downloads taking longer than 3 days.

You can use remote-uploads with authentication. Syntax:

<http://LOGIN:PASSWORD@www.server.com/file.zip> and replace LOGIN with your login on that server and PASSWORD with your password there. We will login on that server with that data then. Please do not use your RapidShare-Login, this is wrong! Your login-data is safe with us. After you have finished any remote-upload, you can delete your remote-job from the list. This way you will delete any data about the remote-upload itself, including the login-data you have given.

You can manage up to 300 jobs at the same time. The system transfers up to 5 files at the same time.

Please make sure, that the link is accessible.

Please check for further information our FAQ:
